Comment

- 1.1 Symbols used in Table 8 should be written in Nomenclature.
- 1.2 Tables 8,9, 10 and 11: it is better to combine the Tables into one nomenclature.

Response

This is a good point. We note that Table 8 is placed automatically by LaTeX. We'll check in the proof stage as MDPI will almost certainly change our tables/positions between now and then.

We combined all nomenclature into a single table.
